

MINERAL FAMILY LOUDER POWDER™

LOUDER POWDER™ BLOOM A

The **Louder Powder Bloom A** is a granular nutrient blend formulated with calcium, magnesium, iron, and nitrogen for the flowering stage. The high quality chelates and precision blending of these nutrients make them readily available to the plant, and easily solubilized in water. BLOOM A is slightly adjusted from the GROW A formula to offer lower concentrations of Nitrogen and higher concentrations of Calcium and Magnesium. These adjusted concentrations allow for a more controlled flowering feed that promotes higher yields and healthier plants. Bloom A is compatible with all irrigation platforms including:

Drip irrigation direct from reservoir mix. Recirculating hydroponic systems.

- Flood & Drain
- Recirculating Deep Water Culture
- Aeroponic
- NFT

Injection from stock tank concentrate.

- Siphon
- Electric Diaphragm
- Pneumatic

Hand mix tanks for traditional wand feeding.

Note: For injection and reservoir mixes GROW A should always be mixed FIRST.

Guaranteed Analysis

Total Nitrogen (N)	14.0%
0.8% Ammoniacal Nitrogen	
13.2% Nitrate Nitrogen	
Calcium (Ca)	14.4%
Magnesium (Mg)	2.26%
Iron (Fe)	0.1%
